A Manual Of Underground Surveying - Civil Engineering ...

Underground surveying embraces the survey operations performed beneath the surface of the earth in connection with tunneling, exploration and construction in subterranean passageways. It is quite different from surveying on the surface. The following peculiarities of underground surveys indicate how they differ from surface surveys:

Underground Surveying Methods and Applications

Before there is a highway through the swamp, the survey crew must first cut lines to show where it will go. The same is true underground. Miners do not wander around aimlessly. The mine plan is carefully designed by the mine engineers. The survey crew then has the responsibility of seeing that the mine continues to go where the plan indicates.
