In the article, "A Sedimentation of the Mind: Earth Project" Smithson investigates the relationship between art and the earth or in other words the human mind and the earth. He focuses on the landscape theory whereby he believed that art played a major role in understanding the landscape. According to him, just like life and nature, good art should be in a continuous process of movement and should be instrumental in understanding the landscape.

Sedimentation also helps to determine the medical conditions of a person. Sedimentation rate of RBC's is an example. The sedimentation rate is performed by measuring how long it takes red blood cells (RBCs) to settle in a test tube. As time passes, RBC's start to separate from the other plasma contents and they settle down at the bottom and ...

Sedimentation is the tendency for particles in suspension to settle out of the fluid in which they are entrained and come to rest against a barrier. This is due to their motion through the fluid in response to the forces acting on them: these forces can be due to gravity, centrifugal acceleration, or electromagnetism.. In geology, sedimentation is often described as the opposite of erosion, i ...

Sedimentation - Wikipedia

The physics of the most common sedimentation process, the settling of solid particles from fluids, has long been known. The settling velocity equation formulated in 1851 by G.G. Stokes is the classic starting point for any discussion of the sedimentation process. Stokes showed that the terminal settling velocity of spheres in a fluid was inversely proportional to the fluid's viscosity and ...
