ionic bonding in sodium chloride on their activity sheet. Give each student an activity sheet . Have students write a short caption under each picture to describe the process of covalent bonding and answer the first three questions.

Energy Levels, Electrons, and Ionic Bonding | Chapter 4 ...

Read Book Activity On Ionic Bonding With Answers

Ionic bonding is the complete transfer of valence electron (s) between atoms. It is a type of chemical bond that generates two oppositely charged ions. In ionic bonds, the metal loses electrons to become a positively charged cation, whereas the nonmetal accepts those electrons to become a negatively charged anion.
