Circle Formulas in Math : Area and circumference of a circle:  
Here Origin of the circle = O , Diameter = D and Radius = r. Area of a circle (A ) =  $\pi r^2 = (\pi/4) D^2 = 0.7854 D^2$  Circumference of a circle ( C ) =  $2 \pi r = \pi D$ . Area of circle =  $(1/2) \times$  Circumference  $\times$  radius.  $A = (1/2) \times C \times r$ . Diameter of a circle (D) =  $\sqrt{(A/0.7854)}$ .

Equation of a circle (H) A collection of 9-1 Maths GCSE Sample and Specimen questions from AQA, OCR, Pearson-Edexcel and WJEC Eduqas. 1. The diagram shows the circle  $x^2 + y^2 = 10$  P lies on the circle and has x-coordinate 1 The tangent at P intersects the x-axis at Q. Work out the coordinates of Q. [5] 2. A circle has equation  $x^2 + y^2 = 4$

### Equation of a circle (H) - JustMaths - Maths Tutorials ...

Learn to use a compass to draw circles. a. Draw many circles

## Online Library Circles F Just Maths

with the compass. b. Now, set the radius on the compass to be 3 cm, and draw a circle. You can do that by placing the compass next to a ruler, and adjusting the radius of the compass until it is 3 cm as measured by the ruler.

### **Circles - Homeschool Math**

Circles are 2D shapes with one side and no corners. The circumference is always the same distance from the centre - the radius. Sectors, segments, arcs and chords are different parts of a circle.

### **Diameter and radius - Circles, sectors and arcs - AQA ...**

Area of a circle = Area of triangle =  $(1/2) \times b \times h = (1/2) \times 2\pi r \times r$ . Therefore, Area of a circle =  $\pi r^2$ . Properties of Circles. The important basic properties of circles are as follows: The outer line of a circle is at equidistant from the centre. The diameter of the circle divides it into two equal parts.

Domains. It has been easy so far, but now we must consider the Domains of the functions.. The domain is the set of all the values that go into a function.. The function must work for all values we give it, so it is up to us to make sure we get the domain correct!

### **Composition of Functions - MATH**

In figure, a circle touches all the four sides of a quadrilateral ABCD whose sides are  $AB = 6$  cm,  $BC = 9$  cm and  $CD = 8$  cm. Find the length of side AD. Solution: Question 73. If  $d_1, d_2$  ( $d_2 > d_1$ ) be the diameters of two concentric circles and  $c$  be the length of a chord of a circle which is tangent to the other circle, prove that  $d_2^2 = c^2 + d_1^2$ .
