the Bourne shell. As such, it has been written as a basis for one-on-one or group tutorials and exercises, and as a reference for subsequent use.

## **The Shell Scripting Tutorial**

In this section of our Bash Scripting Tutorial you will learn the ways you may use if statements in your Bash scripts to help automate tasks. If statements (and, closely related, case statements) allow us to make decisions in our Bash scripts. They allow us to decide whether or not to run a piece of code based upon conditions that we may set.

the default shell in most of the Linux distributions and OS X. It is an open-source GNU project that was intended to replace the sh (Bourne Shell), the original Unix shell. It was developed by Brian Fox and was released in 1989.

### **Shell Scripting Part I: Getting started with bash scripting**

Usually, a bash script starts with a shebang `#!/usr/bash` which indicates to execute the file using the Bash Shell. Let's say that we want to run a Bash Script that prints "Hello World" and "Good Night World". `#!/usr/bash echo "Hello World" echo "Good Night World"` The script file can be saved as `myscript.sh` where the file extension `.sh` indicates that this is a Bash Script

### **Tutorial in Bash (Unix Shell) Scripting - Predictive Hacks**

Create a file using a vi editor (or any other editor). Name script file with extension `.sh`. Start the script with `#!/bin/sh`. Write some code. Save the script file as `filename.sh`. For executing the
